ACCURACY OF INFORMATION

* Our bike size recommendations generally represent a rough guideline for quickly narrowing down the sizes from which to choose based on the body height.

Bike fitting is a complex topic and other measurements and factors have to be accounted for as well. Since no human body is like one another it is not possible to give a 100% correct recommendation for everyone.

Therefore BOMBTRACK cannot guarantee for the stated recommendations to be correct for every individual customer.

The best way to determine the correct size is to consult a local BOMBTRACK dealer or a professional bike fitter and have them determine the needed size.
